## Overview

---

What is wind solar hybrid street lighting?

Wind solar hybrid street lighting is an intelligent and complete stand-alone LED street lighting system.

What are the advantages of wind solar hybrid street lighting system?

The major advantage of wind solar hybrid street lighting system is that when solar and wind power productions are used together, the reliability of the system is enhanced. Additionally, the size of battery storage can be reduced slightly as there is less reliance on one method of power production.

How does a hybrid street light system work?

Composed of solar modules and small wind turbine, deep cycle batteries, controller and one or few street lights, this hybrid system harvests energy from both wind and solar and store it in deep cycle batteries to power street lights during night.
